- Priority setting for getting urgent recordings processed first
- DSS Pro encoding for optimized voice recording

Ready for the future

- Geared for Dragon NaturallySpeaking speech recognition software
- Security features and backup for protecting sensitive data
- Automatic updates and licensing via Web for keeping your software up to date

PHILIPS

Highlights

Efficient workflow management

The SpeechExec Pro software organizes the workflow of dictation files and resulting documents between author and transcriptionist, and allows you to monitor the status of your work.

Perfect companion

Philips SpeechExec Pro dictation software is the perfect companion for the SpeechMike dictation microphone. Control all recording features intuitively with your thumb.

Automatic download

When plugged in, the dictation device automatically uploads your audio files directly onto the computer and into the SpeechExec dictation workflow.

Easy work tracking

SpeechExec provides clear information about the current status of your dictation jobs. It lets you track your work and delivers real-time information, even if transcription is still pending or is already in progress.

Priority setting

With the included priority-setting option, urgent recordings can be prioritized. This guarantees that important dictation files will be identified at a glance and get processed and delivered first.

DSS Pro encoding

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate and reduce file size, network traffic, and required storage capacity. The format also allows additional information, such as client/patient name or document type, to be stored in the file header, further facilitating file organization.

Geared for speech recognition

The seamless integration of Philips dictation recording devices and the direct interface to Dragon NaturallySpeaking Professional speech recognition software guarantee superb audio quality, high recognition accuracy, and easy hardware administration.

Data security and backup

File encryption and secure file transfer allow only authorized individuals to access your documents. The optional automatic backup function protects your data against accidental loss.

Web updates and licensing

The automatic software update option and the state-of-the-art web based licensing keep the SpeechExec Pro workflow software up-to-date at all times – without the hassle of having to check for a new version, download and install manually.

Specifications

System requirements

- Processor: Intel Pentium 4, 1.0 GHz or equivalent processor
