# Our Mission

## Making technology easy

For over 100 years Sharp has been inventing one-of-a-kind products for the benefit of society and businesses around the world. Here in the UK, we have been helping organisations solve their technology problems for more than half of that.

We know the tech landscape is far from simple. It's expansive and ever growing, it's connected and interdependent, complex and evolving. Our mission is simple, to 'Make technology easy'. Just three words, but they drive every step of our process, from product concept and design, to service delivery and support.

The Partners that supply our technology come in all shapes and sizes too, and their customers represent every type of marketplace. One thing they all have in common is their desire for practical, relevant, cost-effective solutions.

The Sharp team works with Partners to understand your organisation, so that your challenges become our challenges, and our successes become yours to share.

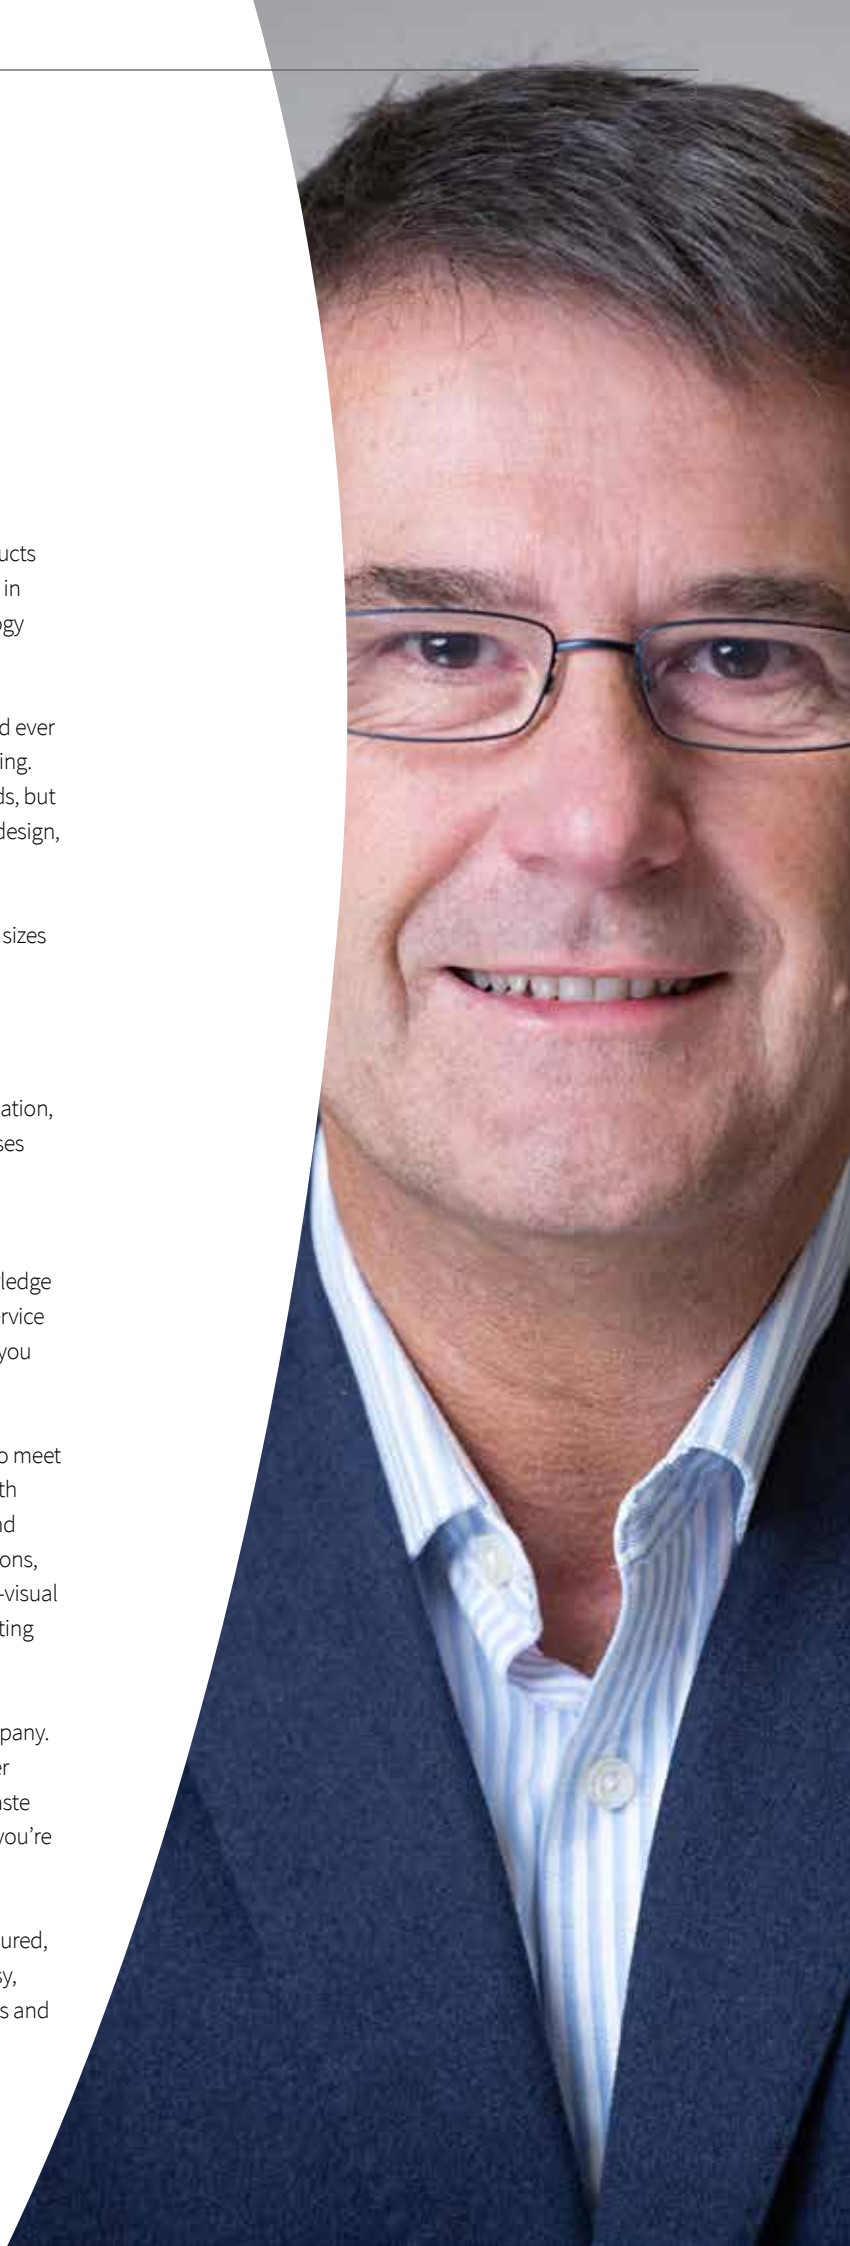

We're here to help organisations grow and achieve their goals, supporting Partners and their customers with our product knowledge and technical expertise. Amassing a network of 16 offices and service centres nationwide, you can rest assured that no matter where you are, we've got you covered.

At Sharp, we are continually developing solutions and services to meet the needs of the modern workplace, as it evolves. By working with our Partners, you'll have access to multifunction print devices and managed print services, print management and workflow solutions, visitor management systems, furniture, and a full range of audio-visual solutions, including interactive screens, digital signage and meeting room technology.

Sharp is committed to being an environmentally advanced company. Our print and software solutions boast some of the lowest power consumption rates in the industry and aim to actively reduce waste and environmental footprint. So, by choosing Sharp's products you're helping preserve the planet for generations to come.

We know technology remains critical to your success, so rest assured, we will be here, along with our Partners, to make technology easy, support you for the long haul, and provide you with the solutions and advice you need.

**Paul Leach,**  
Director of Dealer Sales

# Virtual Showroom Experience

## Virtual is the new reality

We understand you want to explore our products, solutions and services at your own pace. Our new Virtual Showroom Experience brings the showroom to you, letting you do just that. Visit and explore as much as you like.

## Augmented Reality (AR)

Our new Augmented Reality feature is a game changer. You can use it on your own mobile device to see how our to scale product models look in your own space.

## Information in one place

Discover images, videos and product brochures all in one place. View different product configurations and sizes by switching between models. Learn how our products, solutions and services can be used to enhance your employee, student and customer experience.

## Access on any device

It's now easier than ever for you to explore Sharps product and service range all in one place. The showroom can be used on your phone, laptop or any device with internet and browser connectivity. It's simple and intuitive navigation means it's easy for everyone to use.

## Explore the Virtual Showroom Experience

Simply type the following link:

**[virtualshowroom.sharp.co.uk/dealers](https://virtualshowroom.sharp.co.uk/dealers)**

into your browser or scan the QR code below to start exploring our Virtual Showroom.

# Agile and remote working

We are entirely committed to helping our partners and their customers adapt to new working practices.

## For many years to come

2020 will be remembered for many years to come; not only for the devastation Covid-19 reaped across the world, but also for the rapid enduring acceleration around technology, collaborative working practices, real estate consolidation and distributed teams.

## We don't have all the answers

Here at Sharp we don't have all the answers, but we have lots of products and services that can ensure your staff are protected and safe, whilst remaining productive at work or at home as the world continues to recover post-pandemic.

## However, we do have lots of solutions

From our integrated visitor management products, to our visual display technologies which promote informative collaboration, to our workflow and digital transformation offerings - Sharp have some of the most advanced workplace of the future technology solutions which promote connected social distancing, in the work environment.

Also our Sharp Hybrid Mail web solution enables your workforce to safely (via the web) print and post their letters, communications, promotions and invoices from their home office, without ever having to leave their desk.

We can also facilitate home worker packages and solutions that include office furniture, laptops, desktop printers, IT and helpdesk provisions, along with providing AM or PM break-fix service on print devices or laptops used at home, for work.

**We are here to help, just ask us how.**

# Products and Services Overview

Our varied portfolio makes technology easy, letting you focus on the task at hand.

## Office & Production Print

Our industry-leading Multi-Functional Devices (MFDs) and in-house Production Print engines sit at the heart of integrated applications delivering cost savings and time efficiencies.

## Software & Workflow Solutions

MFDs are a great choice for printing, copying and scanning but they can do even more when they're used with our range of Document Management Software, providing solutions for, but not limited to, printing, scanning and workflow management.

## Hybrid Mail

Suitable for any sized organisation Hybrid Mail transforms customer communications into an efficient operation, allowing you to send unlimited numbers of letters quickly, easily and inexpensively.

## Visual Solutions

Our Visual Solutions include award-winning, innovative, interactive touch screens for engaging presentations and collaborative experiences; our range of BIG PAD Interactive Display Whiteboards enhance productivity and allow you to share ideas and information with ease. Our digital signage, content management and video walls provide immersive entertainment for office, hospitality and retail environments, whilst our mobile Interactive Touchscreen Tables allow you to utilise our display technology anywhere.

## Communicate & Collaborate

Sharp's Communicate & Collaborate range includes several unique devices specifically designed to improve workplace collaboration in our new agile and hybrid working world.

## Visitor Management

As part of Sharp's suite of Solutions, our Visitor Management system brings digital transformation into the reception area. It is a smart, secure and easy to use app based platform for visitor, employee, courier and contractor registration - ensuring that you always make a great first impression, protecting the people and places that power your organisation.

## Sharp/NEC Display Solutions

Built using high quality components and Japanese engineering standards, Sharp/NEC products and solutions are trusted for long-lasting reliability. This commitment to quality underpins our sustainable management where, through our repair and refurbishment programs, we extend the long lifecycle of our products even further, reducing waste and adding value.

## Plasmacluster Air Purifiers

Our range of air purifiers and humidifiers support your organisation in keeping your people healthy by emitting positive and negative ions, killing bacteria, viruses, allergens, mould, removing odours, static electricity, and improving skin moisture.

# Office & In-house Production

Whatever your need, Sharp has the ideal solution. Whether it's speed, ease of use, finishing options or networking capabilities we have models to suit every environment – from the small office to the in-house print room.

## Office Printing

Our range of A4 and A3 office MFDs and software solutions are ideal. You get far more than you'd expect from ordinary office laser printers, even our entry-level models are built for quality, reliability, security and ease of use.

Medium to large workgroups will appreciate easy access to the print, copy and scan capabilities, plus a wide selection of paper feeding and finishing options, including booklet making and stapling.

## In-house Production Print

All of our production and large format printers, are rugged enough for sustained high volume in-house production printing and are extremely easy to use and surprisingly energy efficient – capable of high quality output and finishing on a wide range of media. Available with an integrated Fiery Gateway, giving experienced operators one-touch access to EFI's market-leading Command WorkStation, enabling machine or media adjustments to be handled directly from the control operator panel.

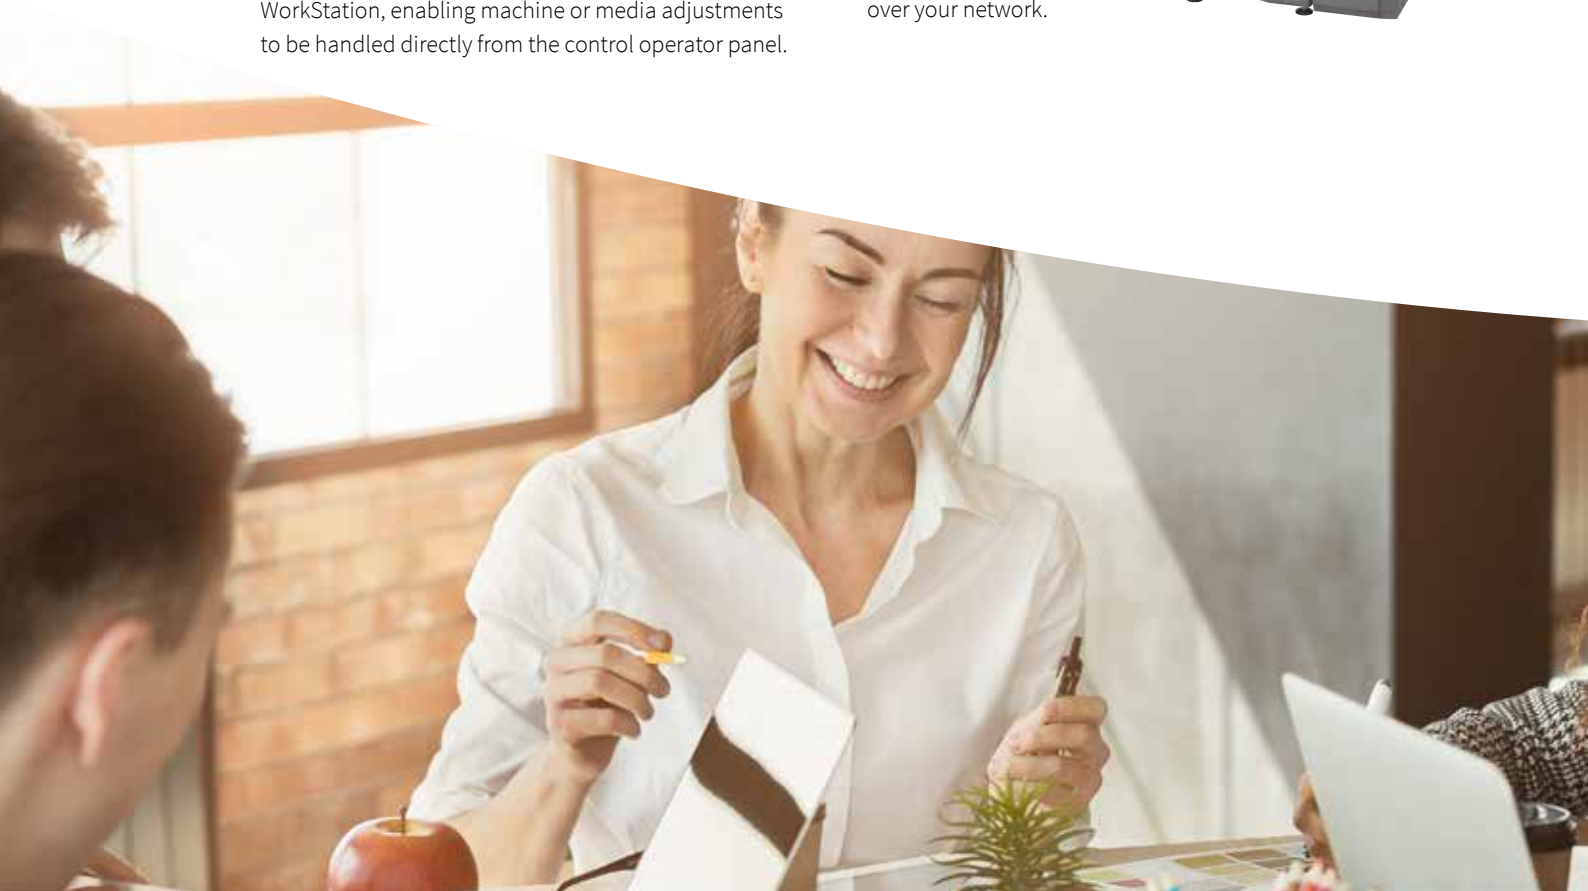

## Managed Print Solutions

Across our range of desktop, MFDs, and In-house Production devices we are able to offer a true managed print solution, bringing additional value and flexibility to our Office & Professional Print capability.

Our service includes break-fix with proactive preventative maintenance, remote device monitoring, software support, full asset management, training and dynamic contract performance reporting, against KPIs - as part of a regular review process.

## Security and GDPR Compliance

Printers and Multi-function devices can be open to security and GDPR compliance breaches as easily as any other electronic device - exposing organisations to potential financial penalties. Sharp offers a comprehensive range of advanced security solutions, combining hardware and software products, that are designed to protect your confidential information while it is being printed, copied, scanned, faxed or transmitted over your network.

## Office & In-house Production

# In-house Production Print

The ability to manage your production print requirements in-house can deliver significant cost and control benefits. But it is essential that you choose the right device for your needs.

Sharp's range of high performance production devices are designed with ease of use in mind. We've given you control of powerful and intuitive print engines, with fast output and quality that endures throughout the whole print run. With these highly productive MFDs, large and complex jobs can be completed in just minutes, and your costs can be brought under control.

Superb media handling, high throughput capacity and a unique ability to print right to the edge of landscape format documents, helps operators to quickly create high quality, full bleed booklets in-line without any manual intervention, or offline finishing.

Plus, if you specify an embedded EFI Fiery controller you can operate it directly from our largest ever integrated colour touchscreen. This means that you won't need to sacrifice space and incur additional cost by adding a dedicated PC, external server or special desk stand.

Office & In-house Production

## Production Print Software

### EFI Fiery

Every Print Room professional knows about EFI's Fiery controller. Its reputation for control, productivity and precision is unmatched. That's why you'll find it at the heart of our most advanced print systems.

The choice of professional Fierys brings out the very best in Sharp's high-volume printing devices, for consistently superior print and dependable accurate results on which you can stake your reputation.

Total colour or greyscale control, powerful image processing, deep integration with Adobe technology and the latest Fiery SmartRIP. It's everything you need to create whatever you want.

PlanetPress Connect unlocks your enterprise data - wherever it is - and makes it available for all of your print and digital business communications.

Now you can streamline your communication processes, from document composition to distribution through any channel, right through to reporting and archiving.

**OBJECTIF LUNE**  
**PlanetPress.**  
**Connect**  
DL™ Software

Intensive manual processes are automated, bottlenecks are eliminated and your communications become timely, engaging and accurate.

Use it for personalised direct mail, branded and interactive invoices, statements and reminders, marketing emails, text messages and more. Whenever you need to communicate, you can do it quicker and more easily with PlanetPress Connect.

## Office & In-house Production

# Key features & options

## A4 MFPs and printers

- Print, Copy, Scan, Fax, File
- Either full-colour or mono
- Standard paper capacity with options to expand
- High quality printing up to 1200 x 1200 dpi
- Single Pass Feeder (SPF)
- Reversing Single Pass Feeder (RSPF)
- USB ports for easy scan to USB memory and USB direct print
- Wired or wireless LAN
- Compact options for easy deployment around the office
- Cloud capable
- Scan to file, folder or network
- Standard PCL/PS3 Emulation
- Sharp OSA option
- Mobile print support
- Colour LCD tiltable touchscreen control panel
- Robust security features

## A3 MFPs

- Print, Copy, Scan, Fax, File
- Either full-colour or mono
- Standard paper capacity with options to expand
- High quality printing up to 1200 x 1200 dpi
- B/W and colour scanning of up to 37ipm
- Single Pass Feeder (SPF)
- Reversing Single Pass Feeder (RSPF)
- OCR allows users to convert scanned documents into editable MS Office files
- Customisable, tiltable LCD touchscreens
- Print Release function
- Short warm up time
- Motion sensors
- Scan to file, folder or network
- Mobile print support
- Single sign-on brings easy access to public cloud storage services
- Cloud capable
- Robust security features

## In-house Production printers

- Print, Copy, Scan, Fax, File
- High speed in full-colour or mono
- Standard paper capacity with options to expand
- High quality printing up to 1200 x 1200 dpi
- Tiltable colour LCD panel with multi touch finger swipe touch control
- Extensive finishing options
- Web browsing option for access to the Internet directly from the control panel
- Fast single and double sided scanning
- Advanced expandability options
- Full compatibility with optional EFI Fiery® print server and workflow
- Dedicated Fiery® gateway key gives instant access to Fiery® Command WorkStation
- SRA3 compatibility for professional in-house document production
- Pantone Licensing offers colour fidelity to the Pantone Matching System
- Industry-leading security solutions for ultimate data/document protection

*\*For more information please visit our website: [www.sharp.co.uk](http://www.sharp.co.uk). Not all features and functions are applicable to all models- please see each individual products data sheet for more information and exact specifications.*

# Software & Workflow Solutions

Automated workflow solutions improve every stage of document management – to optimise productivity and control costs.

## Sharp OSA

Sharp OSA (Open System Architecture) extends the functionality of MFDs by letting you integrate them not just with your network but with your core applications.

### Printing

You can monitor printer usage with Sharp's output management software, ensuring that printers are located for optimum efficiency. The software can also control the access rights for every printer or MFD on your network

### Scanning

Time-intensive tasks, such as scanning and indexing, can be accomplished automatically or by touching icons on the MFDs touchscreen control panel. Document capture has never been easier.

### Mobile

Our Mobile Solutions let you fully integrate smartphone devices of all types with your network, allowing users to securely scan and share documents while they're away from the office.

### Workflow

Streamline repetitive tasks by scanning and sending documents directly and securely to the relevant place or person. Business-critical information is available to authorised employees anytime, anywhere and from almost any device.

### Managing Devices

Sharp's Managed Solutions and device management software makes life easier. Interruptions are minimised, downtime is reduced and productivity is maintained across every work group.

## Software Partners & Solutions

ATI Output management software bridges the gap between office and production print.

BITS has a strong track record in delivering industry leading MPS solutions and applications.

Designed with teachers in mind, DMS Assistant makes using SIMS simple and cost effective.

DocuWare delivers effective document management and workflow automation software.

Simple cloud-based document management. Ideal for scanning and archiving paper documents.

A feature-rich scanning software that offers a smart way to enhance and integrate your scan workflows into your information infrastructure.

Visualise the data in your PaperCut MF or PaperCut HIVE print management system. Pre-integrated dashboards help manage costs, risks and impact.

YSoft SafeQ provides intelligent enterprise office print solutions for document output management of multifunction devices.

Print management tools for your business printing, copying, scanning and faxing, including PaperCut MF and cloud-native PaperCut HIVE.

Prism Software provides a range of applications for the processing and managing of documents and data.

## Workflow Solutions

### Accounts Payable

Our Workflow Software makes processing invoices easy. Invoices are scanned and managed by the workflow software. Optical Character Recognition extracts key data from the invoice quickly and efficiently. By utilising our software, your Accounts Payable department will operate with increased productivity and seamless efficiency.

### Digital Mailroom

With our Workflow Software, your business can rapidly sort and electronically distribute high volumes of post, quickly and efficiently helping you maximise the productivity of your staff. Our software accurately distributes mail to the right individuals or exports to your line of business systems.

### Human Resources

Two of the most valuable assets in any business are its people and the security of its data, especially within Human Resources, these are vital.

Our Workflow Software helps you manage and streamline your HR information and processes, helping your staff become more productive and informed.

*Incorporating innovative digital technology with secure automated workflow processes can fundamentally change how you operate and deliver value to you and your customers.*

# Hybrid Mail

What if sending letters was as quick and easy as email? What if it took just a few clicks and cost less than the price of a 2nd class stamp? Now you can.

If you've ever sent out a hundred letters at the same time, or even a few dozen, you'll know just how cumbersome (and expensive) the process really is.

## **Introducing Hybrid Mail**

Hybrid Mail lets you send unlimited numbers of letters quickly, easily and inexpensively. You simply compose your letters in the normal way, add a few instructions and click on 'Send'. Your final keystroke sends the letter directly to us and we do the rest.

We'll add addresses, check them against the Royal Mail's Postcode Address File, print, fold and insert your letters, then post them out complete with any enclosures. What's more, we can send them in a digital format, too.

## **Efficient and economical**

Until now, the economies of scale and postage discounts enjoyed by mass mailing companies were beyond the reach of small to medium sized businesses. But we've changed all that.

With our Hybrid Mail solution you'll pay the same rates as larger organisations because your correspondence becomes part of a huge consolidated mailing volume.

Mailing options and document selection is easy through the Hybrid Mail Print Driver and the web portal.

Reports can be either viewed in the browser or downloaded as a CSV file.

Customer communications become cheaper and easier, the amount you spend on postage falls, and you have none of the manual overhead. What's more, you don't even need to be in the office. You can use our Hybrid Mail solution wherever you are, whenever you want: all you need is a secure internet connection to our portal.

### Detailed management information

To give you full control, Hybrid Mail also includes a full audit trail and extensive reporting functions, including your mailing history, invoice records, account activity, any mail returned, along with a whole host of useful reports.

### A simple step-by-step process

Simply write your letter - in Microsoft Word, for instance - and when you get to the print dialogue box, specify what needs to happen: whether you're using colour, type of envelope, class of mail and so on. Then click 'Send'. It really is that easy.

For bulk mailing, our web portal takes you step by step right through the process, helping you provide your mailing list, add documents, select options, approve a proof and submit an order.

Full API integration is also available creating a secure link between your systems and our print infrastructure.

# Visual Solutions

## Innovative interactive meeting room screens and digital signage displays

Sharp manufactures some of the world's most advanced flat screen display technology - ideal for mission-critical environments, retail settings, TV studios, design studios and wherever high fidelity screens are essential.

From commercial displays for digital signage, through to interactive and collaborative displays for a true pen-on-paper experience, Sharp has a visual solution for every need.

Our digital signage display solutions and video walls are ideal for any environment where clear communication of complex information is essential.

### **Interactive Solutions - BIG PAD**

Sharp's interactive display solutions allow for effortless collaboration, communication and sharing.

Their easy-to-use and highly responsive touch performance ensure that users are confident and can focus on their primary task. The carefully developed application tools are brilliant for any environment and ensure seamless integration with existing software and hardware.

### **Digital Signage Displays**

Sharp's range of digital signage display solutions bring 4K or UHD screen resolution and exceptional colour fidelity to any environment where effective visual communication is essential. Our professional products benefit from high resolution technology, including 4K and 8K – and have specific capabilities including 24/7/365 operation and landscape, portrait and horizontal installation options, to ensure optimum effect in all conditions and locations.

Our digital displays let you take advantage of smart connectivity and cloud-based dynamic content management\*, making it easy to select and communicate the right message to the right audience at the right time – ideal for busy retail settings, leisure and entertainment centres, meeting rooms, lobbies, transport hubs, conference centres and much more.

#### **Video Walls**

Sometimes, even the largest single LCD display isn't big enough to do the job. There are times when only an entire video wall will do. Sharp digital signage displays can be mounted in portrait and landscape configuration to create high impact multi-screen video walls. Ultra-slim bezels reduce the distance between screens to create a truly impactful, distraction-free wall display, in almost any size and format.

#### **Interactive Touch Screen Tables**

A range of self contained, mobile interactive devices - the perfect solution for any situation where collaboration is essential. Powered by an optional built-in battery pack means that they can be charged and unplugged to use throughout the day, making them fully mobile and eliminating trip hazards, while wireless connectivity opens up even more opportunities for creativity.

#### **Communicate & Collaborate Range**

The workplace is constantly evolving, and so are the attitudes of the UK workforce. Hybrid or agile working is now desired and expected, employees want a blend of home and office working to fit in with their busy lives and improve their work-life balance

Designed for teamwork and clear communication, the range includes our Digital Signage Stands, 3, 5, or 7 seated Collaborate Tables, and our highly mobile 'Levigator' and 'Switch 45' AV Stands. So whether you want to stand out from the crowd, let your teams to work together seamlessly and with ease, or be able to take the technology where it's needed, our Communicate & Collaborate range has you covered.

#### **Sharp / NEC Display Solutions**

With the acquisition of NEC, Sharp now has market-leading additions to our Interactive Display and Digital Signage Display portfolio. With new product categories of Projectors and Desktop Displays.

The latest in bezel-free display technology, Direct View LED video walls offer vivid high-brightness images and superb clarity at any distance, ensuring your message makes the biggest impact possible.

*\*Depending on the model and the application.*

## Visual Solutions

# BIG PAD: Interactive Digital Whiteboard

## Features and Benefits

### Sharp Pen Software

Easily launch and display the Sharp Pen Software user interface – smartly arranged icons that provide easy access to pen settings and functions. Menus can be browsed easily and are displayed in a floating format that allows them to be moved to anywhere on the screen. In addition to handwriting and shape recognition, in overlay mode you can write on screen annotations directly onto photos, videos, PDFs and Microsoft 365 documents.

### HIVE Education Whiteboard

HIVE software is the perfect accompaniment to BIG PAD. Open your existing SMART and Promethean files or create your own whiteboard files with this innovative whiteboard app, perfect for every modern classroom.

### OPS Slots and Modules

The optional OPS PC connects to your Sharp BIG PAD or Professional display via a dedicated slot, which carries power and other connectivities. OPS PC makes the deployment of connected display solutions much easier than an NUC or wall mounted mini PC.

## Visual Display Solutions - Professional Display - Associated Software

# SCREENSPACE™ - BitVu

Create eye-catching and engaging adverts and designs easily with Screenspace™ - the intuitive digital signage solutions from BitVu. Connect and display content effortlessly with Sharp professional display models.

Screenspace Freedom is a small portable media device that fits easily into your palm, allowing for easy transportation and discreet positioning behind the screen. Designed to display high quality digital signage content, the Freedom player provides a cost-effective solution to all your display needs.

### Easy to use system

- Scheduling is easy, simply drag and drop the playlist onto the calendar and pick the date and time accordingly.
- Users can easily upload images and videos from their computer for use within their adverts. All text and media is adjustable and can be scaled and moved freely.
- No internet connection is needed in order to use Screenspace. Download the free app for iOS & Android and start using Screenspace immediately.
- Users can create playlists to ensure their advertisements run seamlessly throughout the day.

## Visual Solutions - BIG PAD & Interactive Displays

### Key features & options

- For education, office and meeting rooms
- Display size ranging from 65" - 86"
- "Pen-On-Paper" user experience with responsive 20-point touch technology
- Excellent reading and writing user experience with integrated palm rejection
- Integrated Android PC for direct drawing and other embedded touch applications
- 4K options available
- OPS slot for optional function enhancement
- Intuitive control with full bezel button controls and on screen touch menu
- Two built-in (10W) stereo loudspeakers
- Sharp Pen Software

## Visual Solutions

# Interactive Touchscreen Tables

Whether you're a business, healthcare or education provider, technology is important for teamwork, learning, communication, and enhancing the daily experience of those under your care. Introducing our range of Interactive Touchscreen Tables.

### Agile

The Agile Interactive Touchscreen Table sits at a fixed height and comes with a screen that can tilt from a vertical position to 54 degrees, making it perfect for either seated or standing use. The device is made from stylish powder coated steel with easy-lock wheels and comes in two variations – with or without a battery pack. From empty to fully charged in 3 hours, the battery model will provide up to 8 hours of continuous use, so you can easily move the screen around an office or school to where it's needed. A built-in camera and microphone enables Agile to be used as a mobile video conference tool for meetings, or keeping loved ones connected in care homes.

### Flex

The Flex Interactive Touchscreen Table works in exactly the same way as Agile. As the name suggests, Flex comes with the added flexibility of using the device vertically or horizontally, and is also height adjustable. So it doesn't matter if you want to work seated or standing, the table can adapt to your needs.

### Early Years

The Early Years Interactive Touchscreen Table is uniquely designed for use in early years education environments, such as nurseries, junior or pre-schools. The product sits at the perfect height for children, and has numerous safety features as standard. Being able to safely tilt the display from vertical to horizontal, you can ensure that children learn to work together as a group, or individually for more targeted learning.

The tables come with the ability to install a range of optional award-winning educational apps by Yellow Door. The apps cover key areas of the curriculum, including: numeracy, literacy, sensory, emotional wellbeing and pre-coding keeps children engaged in teaching and learning content.

With three unique products in the range, each is an easy-to-use mobile screen product designed to give you more flexibility than a dedicated meeting space, or to increase engagement in activities or learning. By making use of market-leading touch technology, the products allow up to 40 simultaneous touchpoints, making them ideal for individual or group use.

*Agile Interactive Touchscreen Table*

*Flex Interactive Touchscreen Table*

*Early Years Interactive Touchscreen Table*

\*Interactive Touchscreen Tables are not Sharp products. Sharp Business Systems UK (SBS UK) is the exclusive distributor of the products, but not the manufacturer. The products have been designed and manufactured by a third-party.

## Visual Solutions

# Digital Signage Displays

So what is it that makes the difference between 'ordinary' and digital signage display solutions? Resolution is part of the equation, which is why we use 4K resolution on some models and have just introduced stunning 8K capability to our range. Adding the clarity you need to communicate fine detail to a distant audience is just one reason why professionals insist on using Sharp digital displays.

The world of visual solutions is changing and Sharp is leading the way by being bold in its research and development, looking to bring the technologies of tomorrow to market ahead of anyone else.

### The high standard in image precision

Digital signage displays are guaranteed to have a much greater impact on your messaging over more traditional forms of signage.

Digital signage allows businesses and brands to cut through the often highly saturated markets they are competing in, increasing customer engagement through targeted content and messaging with a primarily unengaged, on-the-move audience.

In addition, Digital Signage can be an influential element of the marketing communications mix. Quality content - delivered with intense colour and captivating imagery and controlled centrally with precision and purpose - is a fantastic way to speak directly to your audience en masse, anywhere.

# Communicate & Collaborate

Giving your employees the tools to collaborate effectively from wherever they are has never been more important.

The workplace is constantly evolving, and so are the attitudes of the UK workforce – businesses need to be ready to adapt as things evolve. Hybrid or agile working is now desired and expected, employees want a blend of home and office working to fit in with their busy lives and improve their work life balance.

*Collaborate Table*

The easiest way organisations can create a more flexible or dynamic working environment is by reviewing their available space, and by using technology. Dedicated collaboration space with the latest technology can keep people connected and the workforce productive and agile.

## **Collaborate 3, 5 and 7**

Our Collaborate table range is available as a 3, 5, or 7 seated table. Complete with a Sharp screen, you can kick your important meetings off with ease. The solution offers space for collaboration and teamwork, integrated cables for connectivity, and additional power sockets located in the front leg for use by multiple users, allowing your teams to work together seamlessly and instantly.

*Portrait & Landscape Digital Signage Stands*

## **Digital Signage Stands**

Sharp's 55" or 65" professional displays integrate seamlessly with our new portrait or landscape digital signage stands to bring you superior picture quality and crystal clear resolution. The stand has room to house any other technologies that may be required, such as a small form factor PC. Cabling is discreetly hidden within the stand to keep your space looking neat and tidy too - a small cable exit at the bottom of the stand let's you plug in and go.

*Switch 45*

*Levigator*

## **Switch 45 & Levitator**

Our working needs are complex, and shouldn't be confined to a single space. Workplace technology needs to be versatile and highly mobile so that we can work anywhere in the office, at any time. Sharp's Communicate & Collaborate range includes the 'Switch 45' and 'Levigator'. Complete with the latest in Sharp's digital interactive display technology, the stands can be moved with ease thanks to their wheel based and easy locking system. So you can take the technology where it's needed.

# Visitor Management

Protecting the people & places that power your organisation is more important than ever.

With so many people passing through your locations each day, it's crucial to keep a record of who is on or off site. Sharp's cloud-based Optimised Visitor Management (OVM) solution lets you to do just that. The solution is a smart, secure and easy to use platform for visitors, employees, and contractor registration – freeing up administrative resources for more productive tasks, and ensuring you make a great first impression.

## Simple, smarter service

With its intuitive software and touchscreen technology, Sharp's Visitor Management system provides a quick and easy system for self-sign-in and out - the system will instantly notify the host by email or text message that their guest has arrived. And for added convenience, delivery companies or couriers can quickly drop off packages using the dedicated delivery button.

## Fast-track sign-in

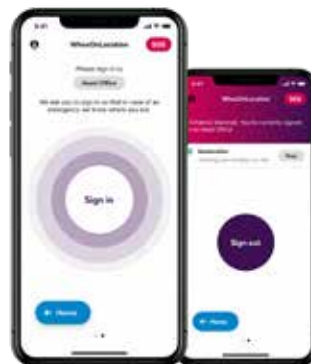

If a visitor or group of visitors have been pre-registered they will receive an email with details of their appointment which includes a QR code they can use to fast scan in and out of the premises. For returning visitors, the sign-in process is much

quicker, as our Visitor Management system can remember their name and who they visited last time. For visitors who are not pre registered they can scan the QR code on the kiosk screen with their smart phone, the kiosk sign in process is replicated on their own device providing a contactless sign in experience.

## Introducing WolMobile

WolMobile is OVM's smartphone app, designed to automate the sign-in process for both staff and approved contractors. Using the geolocation functionality the smart phone will auto sign in and out when you enter or leave the office.

The app can also be used by employees to register when they are working remotely and they can also receive push notifications and messages through the app.

## Optimised Visitor Management

### Everything you need

Depending on your needs, the system is completely configurable. Images, branding and registration questions can be tailored to your exact requirements. In addition, the system automatically prints a badge for visitors or contractors. It can display the visitor and host details and can also be customised with guest Wi-Fi settings any other relevant information.

### People presence reporting

Having accurate information regarding who has visited your location is vital for security, compliance and health & safety reasons. Sharp's visitor management solution has a suite of reporting tools including the facility to create real time and historical reports on people presence for visitors, staff & contractors.

### Making compliance easy

OVM can support organisations comply with GDPR, health & safety regulations and help protect those in your duty of care. The sign-in process can include important information and inductions to ensure that all visitors, employees and contractors are aware of the relevant health & safety procedures and site safety announcements.

### Key Features:

Main Kiosk

- 15.1" medium sized full-colour adjustable LCD screen that sits comfortably on a reception desk or in an entrance or lobby.
- Logitech C920 HD Pro Webcam for accurate face recognition and photo capture.
- Label Printer option that sits compactly, within the device frame.
- Optional Barcode scanner
- Two MINI DisplayPort connectors to supply signal to additional monitors.
- RJ45 port for super-fast Ethernet network connection.
- Simple and easy sign-in system with stereo speakers.

Wall Bracket

Floor Stand

FastScan Card Reader

\*Optimised Visitor Management Kiosk, Wall Bracket, Floor Stand and FastScan card reader sold separately.

# Sharp/NEC Display Solutions

Bringing together the integrated technology and expertise needed to create the IT-enabled world of tomorrow.

## Interactive Displays

The Sharp/NEC range of Interactive Displays provides highly responsive touchscreens for effortless interactivity and collaboration. Not only do they help you increase engagement, they're available in a variety of sizes - so there's a solution to fit any application or environment.

## Digital Signage Displays

Offering a broad choice of options within the Sharp/NEC Digital Signage Display range, you'll be able to find a solution perfect for your needs. Whether you need cost efficiency, a professional look and feel, or enhanced and advanced performance, the range can support the highest demands.

## Desktop Displays

Sharp/NEC can provide a desktop display for almost any requirement. From cost-conscious to mission-critical, performance-oriented displays combine attractive designs with health conscious ergonomics for office, finance, control-room, small signage, creative and publishing applications.

## Projectors

With scalable bezel-free imaging, projection is the most flexible of Sharp/NEC's display solutions, providing creative opportunities to inform, present and impress. Offering many advantages where flat screen displays are unsuitable, projectors can meet the needs of numerous and varied applications.

# Plasmacluster Air Purifiers

Plasmacluster aids with the reduction of airborne particles to help keep the people that power your organisation safe and healthy.

At Sharp, we understand that businesses are successful because of the people that work within them, and protecting those people from potential threats should be a top priority. That's why we've developed our own range of air purifiers and humidifiers. These help reduce the presence of airborne particulates, such as pollen, dust and liquid droplets, and support your business in keeping your people healthy.

## A smart process

Plasmacluster replicates naturally occurring ions and ejects them into the air. These ions are surrounded by water molecules and act as the air cleaning agent to first catch the smallest of particles within the surrounding air.

Once caught, the ions adhere to the microbes and break them down by removing hydrogen from their surface proteins. This causes the tiny particles to pull and form together into larger particulates that sink towards the ground. From there Plasmacluster's fast airflow technology collects and removes them from the air.

Once the microbes are safely drawn into the Plasmacluster filtration system it filters them out, and hydroxide radicals combine with hydrogen to form clean water particles, which is then returned with the clean air to the room.

## Key features & benefits

### Illness prevention

- Allergies such as hay fever
- Virus and bacteria carrying particles

### Odour elimination

- Helps remove smells from clothing
- Filters out odours within rooms

### Improved air quality

- Reduces harmful man-made particles produced through industry, waste treatment or disposal and agriculture
- Eliminates air pollution from cleaning sprays and cosmetics

### Less cleaning

- Dust in the air doesn't settle, less dust means less cleaning

# Sharp on the Environment

## Preserving our planet for generations to come

We are committed to being an environmentally advanced company and this has been Sharp's core philosophy for many years.

We're proud that our print solutions boast some of the lowest power consumption rates in the industry. Intuitive Print Management Software like PaperCut or YSoft reduce print waste, making your solution even more economical, ensuring that we continue to protect our planet now and in the future.

For over a decade, Sharp has demonstrated its commitment to environmental sustainability and preservation. We were the first manufacturer to receive the highly coveted EU Ecolabel for our development of products that adhere to high environmental standards throughout their life-cycle.

In the recent years, hundreds of Sharp products have received international awards for their outstanding eco-friendly design, as well as the Green Apple and Green World awards, and the ISO14001 accreditation. These all help us achieve our aim of becoming an environmentally advanced company.

In our offices here in the UK we are working to become more environmentally friendly with local initiatives to reduce waste, increase recycling and reduce our energy consumption through actions like turning off lights and electrical equipment.

We have a Green Team which is made up of representatives who support local initiatives and help us drive best practice across our sites and encourage behavioural change to promote environmental and sustainability improvements across our organisation.
